

Leading Solar Technology since 1975

The Complete Solar Solution

With over 30 years experience in leading Photovoltaic technology, SANYO has the highest conversion efficiency globally of 22% with its ultra thin HIT (Heterojunction Intrinsic Thin layer) solar cells. The higher power output per panel minimises the total number of panels required compared with conventional panels. SANYO offers on-site consultations and can provide packaged solutions for a range of applications, either as back-up or a completely independent solution.
